

## WHO WE ARE

**KIF1A.ORG** is a global community dedicated to improving the lives of those affected by KIF1A Associated Neurological Disorder (KAND) & accelerating research to find a cure.

## OUR CHALLENGE

KAND is a neurodegenerative disorder caused by a mutation in the KIF1A gene that robs our superheroes of their ability to walk, talk & see. As our children grow, their condition worsens with this progressive—sometimes fatal—disorder, which is why our mission is so urgent.

**There is no treatment. Yet.**

## CALL TO ACTION

You can be the hero to our superheroes. The KIF1A.ORG community of families, scientists, clinicians & supporters like you power life-saving research & therapeutic development. Better care & treatment for children & adults with KAND are within reach, but two obstacles remain in our way: time & money. You can help change the fate of this disease. **Donate today to help KIF1A.ORG achieve our urgent mission at [kif1a.org/donate](https://kif1a.org/donate).**
